# BHUKU

UI Requirements
8/27/18

**Author:** Isabella Nadler (UX/UI Designer)
**Product Manager:** Alan Hurt Jr.

## User Tasks

1) As a new user opening the app for the first time, navigate through the process of signing up for an account (using your gmail) and setting up preferences via the onboarding screens.
2) You have a wedding to attend and need to figure out what to wear. From the home screen, navigate to your cocktail dresses and find a dress to wear. Save it as a new look.

## Pages to Design

Home Screen
Closet Screen
Closet Screen with Dresses Expanded
Cocktail Dresses Screen
Dress Full Screen
Add to Look Modal
Looks Full-Screen

**High Level Requirements**

A clean, functionally simple UI that keeps interface elements to a minimum.
Simple and intuitive ways for users to navigate through the app.
Use of existing design patterns when possible.
Visual and functional consistency.
A restrained, stylish visual design.
Clean, legible text that follows best practices for screen.
Tap-friendly sizing and spacing for interactive elements.
Clear and consistent feedback and progress indicators to convey status during loading.

**Detailed Requirements**
